

Objectives

Objectives of the Energy Forum of Turkey 2008:

- To enable the exchange of ideas and information between industry leaders, politicians, NGOs and scholars so as to be able to succeed in today's changing business world and emerging industries;
- To assist top decision makers in foreseeing the future for multinational, global and sustainable successes;
- To increase the level of professional solidarity in the energy industry on a national and international scale;
- To create a common understanding;
- To keep track of the latest developments in the industry;
- To communicate the current status of research and development programmes;
- To focus on strategic issues;
- To contribute to the energy investments climate in Turkey;
- To give direction to the debates around energy;
- To point to the main challenges awaiting the industry;
- To provide a basis for the development of new policies.

Alongside the host country Turkey, more than 2,000 distinguished delegates from the European Union as well as countries such as the USA, Japan, Russia, Canada, Australia, China, Iran, Iraq, Azerbaijan, Georgia, Kazakhstan, Turkmenistan, Egypt, Syria and Bulgaria are expected to attend the Forum 2008 (Please see: Countries Invited, page 8). The Forum programme aims to attract decision makers and experts from various professional disciplines including:

- The Global Energy Industry
- National Energy Organisations
- Governments
- Professionals
- Financial Organisations
- Equipment Suppliers
- Universities and Institutes
- Contractors
